Getting Started with Power BI Desktop

Now we will learn the basics of using Power BI Desktop. We will accomplish this by completing each task in the project:

Task 1: Introduction

Task 2: Overview of the Rhyme interface

Task 3: Importing the Data

Task 4: Fixing the Column Names

Task 5: Transforming the Data

Task 6: Getting Started with Reports

Task 7: Defaults by Education Level

Task 8: Defaults by States

Task 9: Defaulter Ratio and Slicing the Data

While you are watching me work on each step, you will get a cloud desktop with all the required software pre-installed. This will allow you to follow along the instructions to complete the above mentioned tasks. After all, we learn best with active, hands-on learning
